# OVER 60 YEARS OF PROTECTION

In the year 1958, the successful story of “MARUSHIN HELMETS” began with the founding of a small company by Watanabe Shin for the production of motorcycle helmets. In 2018 MARUSHIN® celebrated its 60th anniversary. Shin’s entrepreneurial vision was marked by a strong sense of quality and ongoing innovation, the typical drivers of rising Japan. By combination of Watanabe’s first name „Shin“ – which means „reliable and steadfast“ and the Japanese word for circle – „Maru“ the name „Marushin“ was created. Maru was the predictive circle around the head of Mr. Shin and MARUSHIN was a perfectly fitting name for a helmet brand born in Japan. This Maru should also predict the customers of MARUSHIN and, in combination with the latest technology, provide protection against bad luck. In the beginning, MARUSHIN helmets were only distribut-

ed in Japan, where it is a tradition to not say a lot about special achievements.

Anyway, not at this point, let’s make clear: MARUSHIN offers products with an impressive price-performance ratio. Be aware that our innovative helmets were assembled by hand with the highest quality of workmanship possible. For more than 60 years now, MARUSHIN helmets fulfill the highest demands of motorcyclists all over the world. You are looking for maximum comfort, for highest standards of safety and you always want to drive one of the lightest helmets in its class?

Then MARUSHIN is also your first choice. Japanese perfection combined with German engineering – this is how MARUSHIN meets the highest quality standards today.

**5-Year Quality Guarantee  
For Premium Line Helmets**

Never ride without a helmet!

When riding a motorcycle, there are special health risks and hazards for the driver and passengers. These risks and dangers can be reduced but not eliminated by wearing a helmet. It is not possible to make any definitive statements about the specific protective effect of a helmet in the event of an accident. A safe driving style adapted to the road and weather conditions is the basic requirement for your safety.

Only use a helmet that fits and wear it properly! Before every ride, fasten the chin strap and check the closure system and chin strap for correct fit!

After a fall or accident or after the use of force on the helmet, its full protective effect is no longer guaranteed!

Similar to the crumple zone in a car, the energy from a collision is absorbed by the complete or partial structural destruction of the outer or inner shell of the helmet. Due to the construction of the helmet, this damage is often not visible to the viewer. The safety helmet is designed to absorb only one impact. After a fall, accident or other force, the helmet must therefore always be replaced. For safety reasons, the old helmet must be rendered unusable. The protective mechanism of the helmet described above can also lead to small cracks in the helmet shell if the helmet falls from a height (<1m). Any helmet that has been subjected to a violent blow must be replaced! No helmet offers protection against all conceivable impacts. Our helmets are specially designed for motorcycling. They are not suitable for other uses.

Check the helmet regularly for damage. Small scratches do

not affect the protective effect of your helmet. The helmet should be replaced after 5-7 years depending on the stress and care. In principle, the outer shell is suitable for a longer period of use, but due to signs of material fatigue and wear and tear in other components, as well as the overall effectiveness of the helmet and unknown general conditions during use, we recommend replacing the helmet after the above-mentioned period for your own safety. Excessive heat (e.g. from exhaust heat) can damage the decoration, the inner shell of the helmet and the interior fittings!

The direct impact of fuels, thinners and solvents can lead to structural damage to the outer and inner shell of the helmet. The helmet must not be brought into contact with such substances! Also not for cleaning purposes.

## 999 RS COMFORT

Since many years the 999 RS is the most popular model in the Marushin product line. It could win a vast number of prizes and awards in product tests by domestic and international motorcycle magazines. Marushin continues that tradition with the newly developed 999 RS Comfort. The internal sun visor, a shield with a new quick removal mechanism and Pinlock®-preparation, a temperature and moisture regulating inner liner or the Marushin ratchet chin strap lock are only a few features, that assure also the 999 RS Comfort is an all-rounder when it comes to comfort, safety and functionality

### FEATURES

- Emergency-Strap-System
- improved moisture absorption and fast drying - reduced bacteria build-up or odour formation
- cheek and center pads easy to remove and washable 100 % Polyester
- Marushin®-Cool inner liner
- newly developed cheek pads with perfect fitting even at high speed
- adjustable chin- and cheek ventilation
- easy handling of ventilation
- removable wind deflector
- removable breath deflector
- Easy to use with glasses
- all levers can easily be used with gloves on
- Micro-ratchet chin strap lock made of stainless steel
- UV-protected by lacquer
- Prepared for intercom installation

### Marushin

### 999 RS Comfort

UVP: ab 279,- Euro

Größen: XS – XXL

Passgenauigkeit/  
Tragekomfort **17/20**

- + Größe fällt normal aus
- + bequeme Passform trotz sicherem Sitz
- + weiches Innenfutter
- + Platz für Brillenbügel
- Sonnenvisier berührt die Brille

Material/Verarbeitung **16/20**

- + innen hochwertig
- der Kunststoff von Belüftungen und Sonnenvisierhebel wirkt „billig“

Sicherheit **10/10**

- + 5-stufiger Ratschenverschluss aus Edelstahl
- + herausziehbare Notfall-Wangenpolster

Windgeräusche **13/15**

- + relativ leise

Gewicht **8/10**

1.435 Gramm in Größe XL

Ausstattung **15/15**

- + antibakterielles Innenfutter
- + Helmpolster herausnehmbar und waschbar
- + innenliegendes Sonnenvisier
- + Helmschale aus Fiberglas

Belüftung/Beschlag **10/10**

- + vorbereitet für Pinlock-Visier
- + effektive Belüftung
- + mit Handschuhen sicher zu bedienen

**M&R: sehr gut 89/100**

Fazit: Wer Marushin nicht kennt, hat was verpasst. Der 999 RS Comfort ist ein bequemer Helm im schicken Dekor, der sich keinen Patzer leistet. Einzig die schwarzen Kunststoffelemente werden der Qualitätsanmutung des übrigen Helms nicht gerecht.

Top Tipp

Text: Thomas Kryschan; Fotos: Marushin, M&R Archiv

## MARUSHIN 999 RS COMFORT

Seit 1958 stellt der japanische Hersteller Marushin Motorradhelme her. Bei der Anprobe des Fiberglas-Helms Marushin 999 RS Comfort gefällt dieser mit leichtem Einstieg, satter Passform und einem angenehm weichen Innenfutter. In der getesteten Größe XL fällt der Helm normal aus. Das Gewicht ist mit 1.435 Gramm der Ausstattung angemessen. Der Kinnriemen wird mittels Ratschenverschluss arretiert.

Das innenliegende, herunterklappbare Sonnenvisier ist eine feine Sache. Sein Bedienhebel sitzt hinter der linken Visiermechanik, lässt sich gut ertasten und leicht betätigen. Brillenträger sollten testen, ob sie es auch nutzen können. Bei größeren Brillen berührt das Innenvision bereits die Gläser, bevor es vollständig heruntergeklappt ist. Die Brillenbügel lassen sich hingegen problemlos in den Helm einführen und drücken nicht hinter die Ohren. Aussparungen im Futter bieten hier genügend Platz.

### Vorbereitet für Pinlock-Visier

Dank Pinlock beschlägt der Helm auch im geschlossenen Zustand nicht.

Sein großes Visier bietet ein breites Sichtfeld. Zwischen der voll geöffneten und der geschlossenen Stellung hat die Visiermechanik drei weitere Raststufen für Frischluftfans. Der Wechsel des Visiers geht beim Marushin 999 RS Comfort besonders schnell vonstatten. Ein Tastendruck links wie recht genügt und schon hat man es in der Hand.

### Angenehmer Begleiter auf Touren

Auf Testfahrten liegt der Marushin 999 RS Comfort in allen Geschwindigkeitsbereichen neutral im Fahrtwind und hält sich mit Windgeräuschen angenehm zurück. Die verstellbaren Belüftungen, eine am Kinn und zwei an der Stirn, haben einen spürbaren Effekt im Inneren und lassen sich selbst mit dicken Handschuhen sicher bedienen. Die Preise für den Marushin 999 RS Comfort beginnen bei 279,- Euro für die einfarbigen Modelle. Die mehrfarbigen Dekore kosten 299,- Euro.

## RS3 SPORTHELMET

Part of the Marushin product line for only one year but already a bestseller, which is recommended by sport riders and journalists equally. With the RS3 Marushin purposely renounces gimmicks and unnecessary features and concentrates completely on what matters when it comes to riding a bike. The superlight RS3 is everything a sports rider needs to enjoy his passion.

### FEATURES

- Emergency-Strap-System
- improved moisture absorption and fast drying - reduced bacteria build-up or odour formation
- cheek and center pads easy to remove and washable 100 % Polyester
- Marushin®-Cool inner liner
- newly developed cheek pads with perfect fitting even at high speed
- adjustable chin- and cheek ventilation
- easy handling of ventilation
- all levers can easily be used with gloves on
- removable wind deflector
- removable breath deflector
- Easy to use with glasses
- Double-D chin strap lock made of stainless steel - mandatory in international race series
- UV-protected by lacquer
- prepared for intercom installation Material

# RS3 TECHNO

Integralhelm Marushin RS3

## MARUSHIN RS3

**Z**u Preisen ab 279,- Euro für die mattschwarze Variante bietet Marushin den Fiberglashelm RS3 an. Die getestete Variante mit Samurai-Dekor kostet 20,- Euro Aufpreis. Für die Techno genannten Dekore in Weiß oder fluoreszierendem Gelb werden 319,- Euro fällig. Lediglich 1.315 Gramm wiegt der Helm in der Größe XL. Bei der Anprobe gefallen der leichte Einstieg und die Brillenkanäle, die ein leichtes Aufsetzen der Sehhilfe ermöglichen. Um die Ohren herum bietet das weiche Polster viel Platz. Es ist herausnehmbar und waschbar. Die Wangenpolster gestaltete Marushin für das 2021er-Modell neu. Wie der gesamte Helm drücken sie nicht und sollen auch bei hohen Geschwindigkeiten den wackelfreien Sitz sicherstellen. Und das funktioniert hervorragend. Selbst bei Autobahntempo auf einer unverkleideten Ducati Monster liegt der Marushin RS3 neutral im Wind, drückt nicht gegen die Stirn und bewegt sich auch beim Schulterblick kaum. Die geringe Aerodynamik sorgt zudem für geringe Windgeräusche bei allen Geschwindigkeiten. In dieser Kategorie gibt es daher volle Punktzahl. Die Belüftung wurde ebenfalls im Windkanal optimiert und schaufelt in geöffneten Stellung viel Frischluft in den Helm. Dass der Schieber der Kinnbelüftung auf der Innenseite des Kinnteils sitzt, sorgt zwar für eine ansprechende Optik, stört jedoch in der Praxis, zumal der direkte Zugriff von einem weichen Windabweiser am Kinn behindert wird. Am gelungenen Gesamteindruck des Helms kann das nicht rütteln. Die Visiere sind für eine Pinlock-Scheibe bereits vorbereitet. Es gleich beim Kauf mitzubeste-

stellen (Kostenpunkt 29,- Euro), können wir nur empfehlen. Dann ist der Marushin RS3 zu 100 Prozent beschlagfrei. Der herausnehmbare Atemabweiser vor der Nase trägt seinen Teil dazu bei. Die Raststufen des Visiers sind praxisgerecht. Die Visiermechanik arbeitet leise, spielfrei und leichtgängig. Trotzdem arretiert sie die Visiere auch bei hohen Geschwindigkeiten zuverlässig. Besonders die Lüftungsstellung, die nur einen minimalen Spalt frei gibt, ist sehr angenehm und springt selbst bei steigendem Winddruck nicht zu. Der Wechsel der Visiere gelingt schnell und unkompliziert ohne Werkzeug über einen Drucktaster. Fünf Jahre Garantie gibt Marushin auf den RS3. Das zeugt von einem gewissen Selbstvertrauen, was die Qualität angeht. Einen Schönheitsfehler leistet sich der insgesamt durchdachte Helm dennoch: Der Reflektor am Nackenpolster ist so weit vorn und Richtung Kopf positioniert, dass ihn bei aufgesetztem Helm garantiert niemand sieht.

### Fazit:

Für einen Einstiegspreis von 279,- Euro bietet Marushin einen leisen, sehr bequemen Fiberglashelm mit durchdachten Details. Vor allem sein niedriges Geräuschniveau und die effektive Belüftung gefallen. Mit Dekor und Pinlock-Scheibe klettert der Preis jedoch schnell auf bis zu 348 Euro. Konkurrenz gibt es mit dem Marushin 999 RS Comfort, den wir in Ausgabe 100 testeten, vor allem aus den eigenen Reihen.

## M-410 FLIP UP HELMET + M-410 CARBON

The Japanese cult brand Marushin looks back on a long tradition of manufacturing super light fiberglass helmets. So it is no surprise that the newest top model in the category of system helmets is also following that tradition. The result is the completely new M-410. With a record-breaking weight of just 1.500 g (+/- 50 g) Marushin once again managed to set standards. Its compact outer shell, a new temperature and moisture regulating inner liner, the Pinlock®-prepared visor or the Marushin ratchet chin strap lock made of stainless steel are only a few among many features, which will make the M-410 one of the best-liked system helmets for sportive touring riders.

### FEATURES

## **ECE-R 22.06**

Since 2021, helmets can now also be tested according to the successor standard ECE 22.06. Starting from June 2022, helmets will be tested exclusively according to the ECE-R 22.06 standard. Helmets that exclusively comply with the ECE 22.05 standard may no longer be produced by manufacturers from 2023, and from the beginning of January 2024, the authorities can prohibit their sale. - As of April 2022...

Important for all end consumers: Helmets with the previous current homologation ECE 22.05 can still be used after the year 2024; customers are not forced to purchase a new helmet!

During the transition period until 2024, manufacturers have time to adjust their helmets to meet the new requirements. Motorbike helmets with the ECE 22.05 standard can be sold up to that point and can continue to be worn afterward.

In Germany, only motorcycle helmets that comply with the ECE standard can be sold, although the approval mark is not necessary. According to § 21a StVO (German Road Traf-

fic Act), motorcyclists are only required to wear a "suitable protective helmet."

However, it is highly recommended to use a helmet that complies with the relevant standards. Such a helmet meets the necessary safety standards, provides more protection, and can prevent severe injuries. Especially for those traveling abroad, a helmet complying with ECE-R 22.05 or from 2024, ECE-R 22.06, is essential. In other countries, there is a corresponding legal requirement that is enforced, and fines may be imposed.

The new ECE 22.06 standard for motorcycle helmets includes more test points than its predecessor. The testing procedure has also been slightly modified, for example, helmets are now tested for their resilience at a higher impact speed. Motorcycle helmets are also tested at a lower temperature and subjected to a rotational impact test, among other changes.

Unfortunately, another consequence of these changes is the expected increase in helmet weight and potential price adjustments.
